A Unique Hotel in the Heart of Madrid

Located on the iconic Calle San Bernardo, between Gran Vía and Callao, it offers an unbeatable location to explore the city's top tourist and cultural attractions.

With excellent connections by metro, bus, and easy access to the airport, it's the perfect choice for your stay in Madrid.

1,000 M2 HANGING GARDEN

Guinness World Record for the largest vertical garden in the world in 2011.

Inhala is the hotel with a hanging garden that is unique in the world for its characteristics.

A lung in the centre of Madrid that can absorb up to 4 tons of CO₂ equivalent per year, capable of reducing the temperature in its surroundings by between 4 and 6 degrees and that attracts bird species that brighten up the hotel's ambient sound.

A true microclimate with more than 260 plant species and a 20-metre high waterfall.

Zero footprint: Greenwall strategy

GreenWall aims to promote and lead a more responsible urban tourism that reflects our icon, the vertical garden: a "green wall" where to project a clean, efficient and desirable tourism, a "green wall" to plug into to recharge the essence of the sustainable city, capturing carbon, reducing waste and fostering human connections.

Urban lung

With the largest vertical garden in Europe, the hotel has become a true lung in the middle of the city. It improves the appearance of the urban environment, purifies the air, absorbs carbon and produces oxygen. Our goal is simple and clear: to fight climate change and reduce pollution in big cities.

Green design

The vegetal complexity of our vertical garden is compensated by the simplicity of our spaces, designed with functionality and minimalism. Our clear objective: to avoid unnecessary waste and protect Madrid's precious natural spaces.

Flourishing community

Like a plant ecosystem, our company is woven with connections and partnerships. Our goal is clear: to positively impact our community, provide an exceptional work environment for our employees, and care for and inspire our customers.
