Hyatt Centric Milan Centrale has obtained the prestigious LEED Gold certification for its sustainability-oriented approach, which saves energy and water as well as reduces CO2 emissions. Its improved ecological quality are the weapons needed for a **green** future.

What does our Green Beat consist of? We guarantee the sustainability of our structure and the health of the air you breathe; the wood that surrounds you comes from certified and controlled forests, none of the materials used generate organic gases and the heating and air-conditioning systems are managed to ensure maximum technical comfort.

### WATER

We reduced our water needs by 40% by using rainwater to keep our toilets clean. We also only use timed and ventilated taps.

### TRANSPORTATION

We encourage the use of the public transport network, which is easily accessible from our hotel, or bike sharing.

### ENERGY

We reduced our energy needs by 30% thanks to the LED lighting installed throughout the building, including the wonderfully colored façade that can be admired at night. To heat and cool the hotel, we use groundwater, and our photovoltaic system produces clean energy.
