OUR SECRET DESTINATION

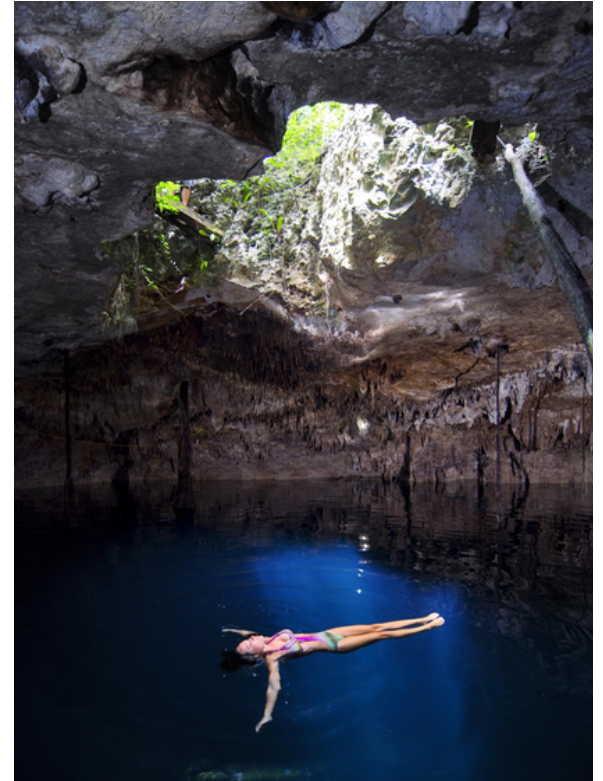

CENOTES

Sacred Underground Rivers

The Yucatan Peninsula, emerged as the ocean receded over 65 million years ago.

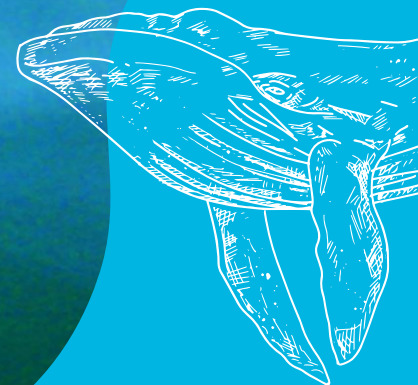

The limestone shelf that makes up the peninsula is porous, that's why rain waters filter down into the substructure creating underground rivers and pools called Cenotes, which are perfect options to those visitors looking for a whole new world.

PROTECTING THE WORLD

JW Marriott Cancun Resort & Spa and Marriott Cancun Resort have developed a sea turtle protection and release program which saves an average of 3,000 endangered baby turtles each year.
