

SUSTAINABILITY POLICY

1. Carbon Footprint

The establishment has a sustainability police implemented, which involves measuring and reducing carbon emissions following industry standards and methodologies (e.g.HCMI)

2. Energy

The establishment annually measures energy use and has at least two energy demand reduction technologies implemented in guest-facing conditioned spaces (e.g. low-energy lightning, smart building technology, automatic switch-off for lightning or HVAC.)
Energy

3. Responsible Business for Guests

There is a towel and sheet reuse program and promoted to guest.

4. Responsible Business for Team Members

The management holds periodic meetings with the staff to brief them on issues concerning existing and new environmental initiatives (i.e. usw of green cleaning products).

5. Use of Water

The establishment annually measures water use and has controls in place to reduce water consumption (i.e. flow reduction in toilets, taps or showers).

6. Waste Separation & Recycling

The establishment identifiels wast and separates wast as per statutory law or with a minimum of three categories (e.g. recycling, food, landfill).

7. Actions to reduce Pollution

The establishment takes initiatives to the use of single-use product or packing as well as paper (e.g. soap dispensers, air hand dryers, water refill stations, no single use plastic straws or stirrers, etc.).

8. Purchasing

If the establishment serves F&B options, those are partially plant-based and /or locally sourced.

9. Mobility

The establishment informs and encourages to use sustainable transportation alternatives (e.g. EV shuttle, public transport, bicycles, mopeds/ Scooters.)

10. Bio-Diversity

The hotel supports biodiversity and and take initiatives for it.

11. Social

The hotel supports the local community and takes initiatives initiatives to reduce inequalities.
